Andrea Locatelli graduated in physics at the University of Trieste in 1994. He continued his studies in Cambridge (GB), where he joined the group of Prof. Sir. David A. King and obtained a PhD in Physical Chemistry. Currently, he is the coordinator of the Spectroscopy, Photoemission and Dynamics group at Elettra-Sincrotrone Trieste. His main scientific interests are in the field of surface chemistry and materials sciences, which he addresses using synchrotron-based spectroscopy and microscopy. His research activity mainly focuses on the study of surfaces, interfaces and ultra-thin films, tackling topics related to the characterization and control of the chemical, electronic and magnetic properties of low dimensional systems. Andrea Locatelli has coauthored more than 225 papers in international referred journals and gave more than 60 presentations at international workshops, conferences as well as in various universities and research centers.
