

General overview and a deeper look at strategies and instruments of Helmholtz Association

Dr. Jörn Krupa Trieste, 07/06/13

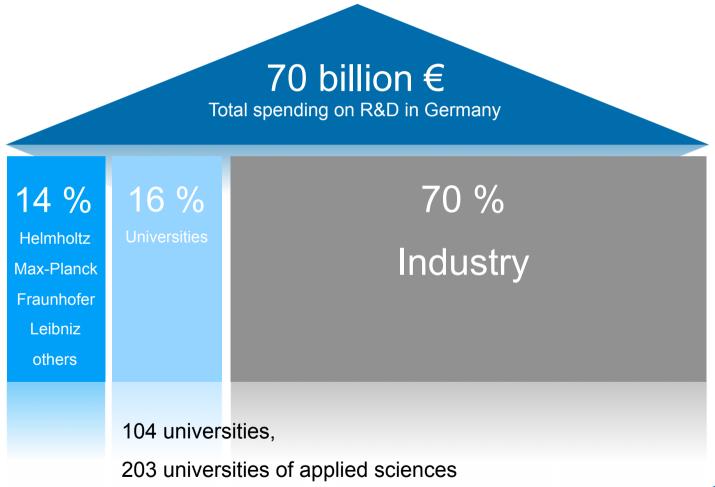

OUTLINE

- Helmholtz Association in the German Research System
- Technology Transfer in Germany
- Helmholtz Technology Transfer: Organization, Track record and Instruments
- Innovation and Infrastructure Success Stories
- Conclusion and Goals

HELMHOLTZ ASSOCIATION IN THE GERMAN RESEARCH SYSTEM

HELMHOLTZ ASSOCIATION AND THE OTHER **GERMAN RESEARCH ORGANISATIONS**

	Budget/ billion	Staff	Centres/ Institutes
Helmholtz Association Use-inspired basic research with strategic programmes	€ 3.76	33,619	18
Max Planck Society Pure basic research	€ 1.89	17,019	80
Fraunhofer Society Industry-oriented research and development	€ 1.8	20,000	60
Leibniz Association Long-term research topics Currently available figures.	€ 1.5	17,259	86 HELMHOLTZ ASSOCIATION

HELMHOLTZ ASSOCIATION

Facts and Figures*

 18 Research Centres, legally independent entities

- 33,619 Staff
 - 11,369 scientists & engineers
 - 6,234 PhD students
 - 1,623 vocational trainees
- Budget 2013: €3.76 billion
 - €2.37 bn: Institutional funding (90% federal, 10% local)
 - €1.23 bn: Third-party funding**
 - €0.17 bn: Special Financing

^{*} including GEOMAR

^{**}including contracts of project management agencies about €121 m

HELMHOLTZ ASSOCIATION

Research Centres

- Alfred Wegener Institute for Polar and Marine Research
- Deutsches Elektronen-Synchrotron DESY
- German Cancer Research Center
- German Centre for Neurodegenerative Diseases
- German Aerospace Center
- Forschungszentrum Jülich
- Karlsruhe Institute of Technology
- GSI Helmholtz Centre for Heavy Ion Research
- Helmholtz-Zentrum Berlin für Materialien und Energie
- Helmholtz-Zentrum Dresden-Rossendorf
- Helmholtz Centre for Environmental Research UFZ
- Helmholtz Centre for Infection Research
- GEOMAR Helmholtz Centre for Ocean Research Kiel
- Helmholtz-Zentrum Geesthacht Centre for Materials and Coastal Research
- Helmholtz Zentrum München German Research Center for Environmental Health
- Helmholtz Centre Potsdam GFZ, German Research Centre for Geosciences
- Max Delbrueck Center for Molecular Medicine (MDC) Berlin-Buch
- Max Planck Institute for Plasma Physics (associated)

HELMHOLTZ ASSOCIATION

Mission and Research Fields

- Seeking solutions for major societal challenges with cutting-edge research
- Think big, act big: Developing and operating complex infrastructure and large-scale facilities for the national and international scientific community
- Creating wealth for society and industry through transfer of knowledge and innovation

Energy

Earth & Environment

Health

Aeronautics, Space and Transport

Key Technologies

Structure of Matter

HELMHOLTZ ASSOCIATION USP as Chance for Innovation - Examples

- big research infrastructures
 - Research vessels and aeroplanes for marine and polar research
 - Beamlines and detectors for particle physics
 - Systemic phenotyping, archiving and distribution of mouse models for health research
- use inspired basic research
 - Energy research (e.g. geothermal, solar)
 - New materials (e.g. magnesium technology)
 - Earth and Environment (e.g. Climate Information Centers, Big Data modelling by supercomputing)

Benchmarking – EU and US

Compared to US the performance of EU (and Germany) is weaker, but in relation to research expenditures*
European PRO are more efficient concerning the number of start-ups and license agreements

License income (million €)

Patent grants

TECHNOLOGY TRANSFER IN GERMANY Characteristics of German Innovation System

- compared to EU 27, US and Japan there is a highest share of third party funds coming from the industry in Germany (14 % universities, 11 % PRO)
- traditionally strong interaction between Academia and Economy
- moreover effect from the unique contract research model and success of Fraunhofer
- high and growing R&D Expenditures from Industry AND the State to reach the 3%-Goal of Lisbon Agenda (2011: 2,88 % thanks to 1,94 % by Industry and 0,98 % public research expenditure)
- High-Tech Start-ups: small number and weak dynamics in Germany, especially since 2001

Initiatives and public funding

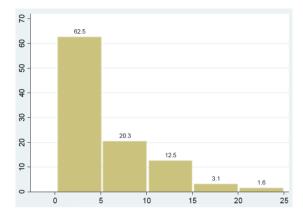

High-Tech Strategy: national approach which integrates numerous research and innovation activities and involves all government departments

- Federal Ministry of Economics and Technology (BMWi):
 - SIGNO for valuation and exploitation of intellectual property, funding of patent marketing agencies for universities (PVA)
 - KMU-Innovativ for supporting of Start-ups / SME
- Federal Ministry of Education and Research (BMBF)
 - EXIST: two instruments for fostering spin-offs
 - Go-Bio: Start-ups in Biotech
 - Proof-of -Concept-Funding (VIP): appr. 60 projects 2010-2012
 - Pilot projects for Innovation in PRO

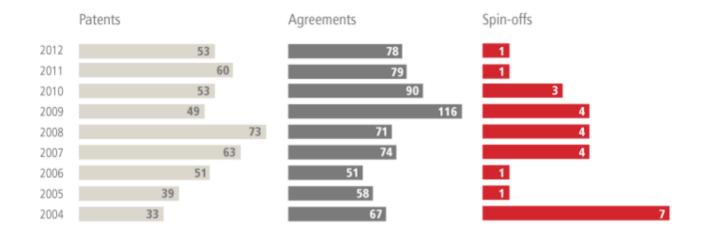

Agencies and Facilities

 TTO of Universities and PRO, including commercial arms
 (e.g. TU Dresden, HU Berlin, MPI)

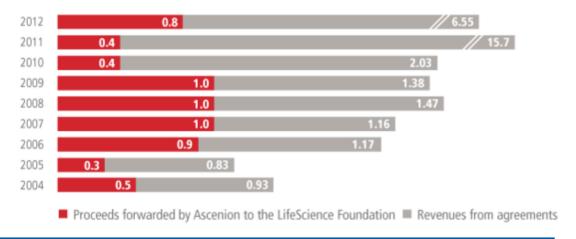

- independent public and private Transfer agencies
- Technology Parks ans Incubators
- Public funded patent marketing agencies (PVA)
- Facilities of industrial collaborative research / external Industrial research facilities
- Cluster Management, Chambers of commerce
- Ascenion GmbH for valuation and exploitation of intellectual property in Life Sciences (4 Helmholtz Research Centres)

KPI of leading TTOs: Ascenion GmbH

Revenues for Ascenion's partners

KPI of leading TTOs: Fraunhofer Venture

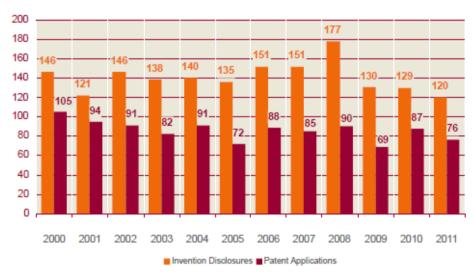

founded in 2001 as a department within the headquarters
team of 18 People
in over 150 foundations involved
currently 80 technology shareholdings
internal Fund with 1.5 Mio. Euro p.a. to support spin-off-projects
external VC-Fund with a close link to Fraunhofer
approx. 40 new spin-off-projects p.a.
approx. 15 foundations p.a.
approx. 10 new shareholdings p.a.
> 50% of spin-offs are financed by VCs, Business Angels and banks
low insolvency rate (lower 10%)

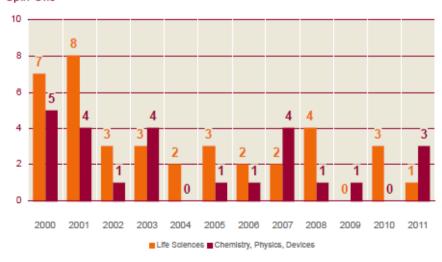

ASSOCIATION

TECHNOLOGY TRANSFER IN GERMANY KPI of leading TTOs: Max Planck Innovation GmbH

Invention Disclosures / Patent Applications

License Income (Mio EUR)

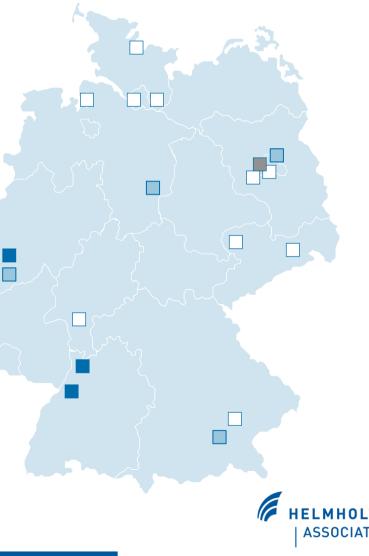

Cost-Benefit Analysis (Mio EUR) > € 150 Mio. net profit since 1990

Organisation in the 18 Helmholtz Research Centres

- Head Office Berlin: Support and coordination of Tech Transfer activities
- Large Helmholtz Centres with own professional Tech Transfer units
 - KIT Karlsruhe Institute of Technology
 - F7J Research Centre Jülich
 - DLR German Aerospace Center
 - DKF7 German Cancer Research C.
- 4 Life Science Centres cooperating with a private partner (Ascenion)
- Other centres with small Tech Transfer units

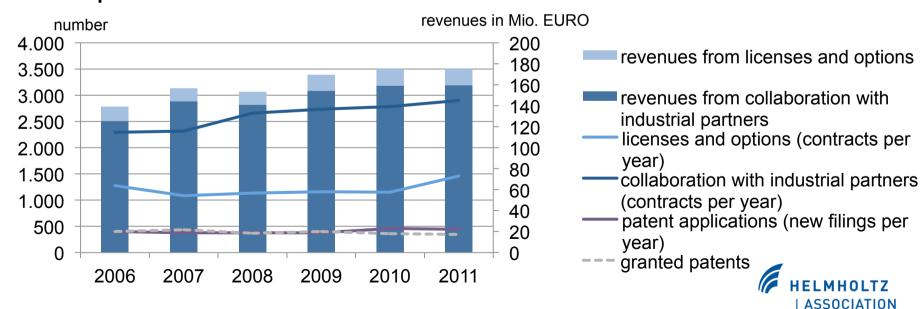

Staff: > 100 Experts

Track Record

- 2,000 collaborative projects with industry with revenues of € 155 mio (2012)
- 1,400 licencing agreements with revenues of € 22 mio (2012)
- 400 new patents are filed every year
- 80 spin-offs between 2005 and 2012

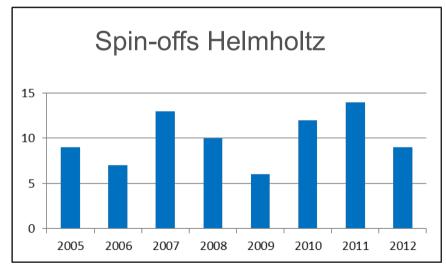

Supporting Instruments and Activities

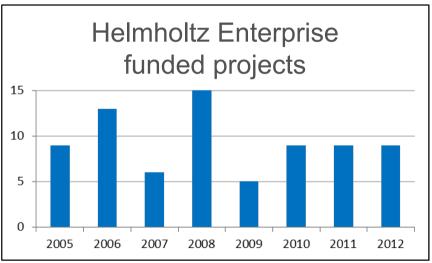

- Network / working group of technology transfer experts from the research centres since 30 years called TTGR
- Workshops and thematic interactions with Industry (e.g. in 2012: Zeiss Open Innovation Workshop, Siemens Energy Workshop, Roche Helmholtz Research Day)
- Up-Coming Open Innovation Workshops between relevant Helmholtz-Centres and Bosch, IBM and Bayer
- Innovations Days 2012 in Munich and 2013 in Berlin as
 Partnering event, showcase and commercialisation platform for
 spin-offs and technologies (together with MPG, FhG and WGL) one
 focus this year will be the access and added value of Infrastructure
- 2 Funding Programs from the head office:
 Helmholtz Enterprise and Helmholtz Validation Fund

Helmholtz Enterprise

- since 2005 more than 75 spin-off-projects have been supported with 260,000 € each
- new definitions and funding of Interim Management allowing "Spin-offs" with researchers as CSO and experienced external Managers as CEO

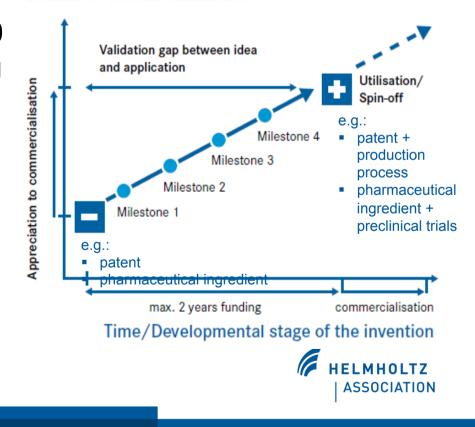

Helmholtz Validation Fund

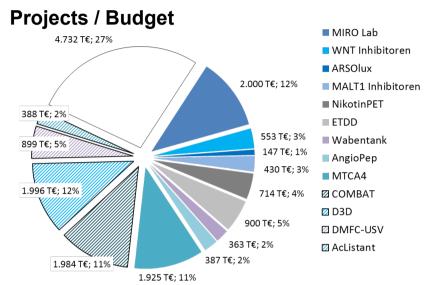

- "proof-of-concept-fund" as new internal programme to bridge the "valley of death"
- Funding budget 2011-2015 of 20 m € by Helmholtz, with matching over 40 m € (return on invests, but no real revolving fund)
- Projects have to show proof of concept / market potential to increase value and chance of commercialisation

Value of the invention/
Chance of commercialisation

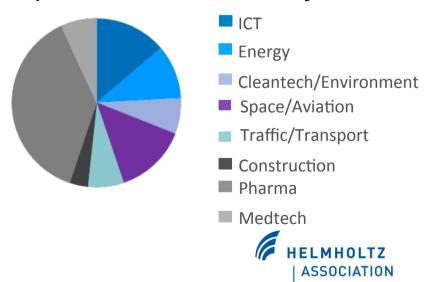

Helmholtz Validation Fund

- Financial support (up to 4 m € within 2 years including 50 % matching)
- Management support by coaches and professional fund management
- Decision for granting is made by an experienced investment board
- 12 on-going projects, selected from 30 proposals
- Next round: September 2013

Proposals / Branches of Industry

Further activities and effects in the Centres

- Various strategic collaborations and common Labs, e.g. IBM-DESY, HMGU-Roche, DKFZ-Siemens, KIT-BASF
- Commercial arms to improve offering of unique Infrastructure, e.g. HZDR Innovation GmbH for Ion beam source for customers from Automotive
- Incubator on campus, e.g. KIT
- Helmholtz Centres as nuclei of cluster development, e.g. HZB and Photovoltaic Enterprises in Berlin

New Products and Processes

- Examples from Life Sciences:
- Gardasil (HPV; Vaccine)
- Removab (maligmant ascites; antibody)
- Akita (aerosol therapy system)
- IXEMPRA (tubulin-binder; small molecule)
- Examples from Physical Sciences:
- oil heating systems work using the "blue burner" technology from rockets
- innovative production process for low emission cement "celitement"
- new bonding technique spot friction welding

INNOVATION AND INFRASTRUCTURE Examples for Helmholtz Large-Scale Facilities

 unique infrastructure enables disruptive innovations, e.g. in pharma, biotech, material research, clean tech

Synchrotron Radiation Source – PETRA III Long-Term Population Study – National Cohort		
Long-Term Population Study – National Cohort		
Jülich Supercomputing Centre – JSC		
Modular Earth Science Infrastructure – MESI		
Accelerators and Experimental Facilities at GSI		
FAIR Green IT Cube – Cube		
Research Reactor in Berlin – BER II		
Synchrotron Radiation Source – BESSY II		
Radiation Source – ELBE		
High Magnetic Field Laboratory in Dresden – HLD		
Ion Beam Centre – ISZ		
German Engineering Materials Science Centre – GEMS		
Synchrotron Radiation Source – ANKA		

INNOVATION AND INFRASTRUCTURE

Success Stories

 Societal innovation from technical solutions of large research infrastructures, e.g. the famous example of CERN and the invention of the www in 1989

In the Helmholtz Association:

- Commercialisation of Research Results, e.g. Ion Beam Therapy developed by GSI or Proton Therapy developed by HZB for cancer treatment
- Research solutions as new common standards also for industrial partners, e.g. new electronic standard developed by DESYresearchers, proof-of-concept phase funded by Helmholtz Validation Fund

INNOVATION AND INFRASTRUCTURE

Success Stories

- Access for industry / SME (e.g. chemical firms rent beam times at DESY for improvement of catalysts)
- Innovative process technologies as a result of setting-up Research Infrastructure (e.g. Welding Technologies for the stellarator Wendelstein 7-X (IPP) or detector technologies for GSI)
- Supporting spin-offs by allowing the use of infrastructure (e.g. Labs,
 MRT facilities or Supercomputing Centers) for usual market prices

INNOVATION AND INFRASTRUCTURE

Success Stories

- Nobelprice für Physics 2007 for Prof.
 Dr. Peter Grünberg from FZ Jülich (with A. Fert)
- Discovery of the Giant magnetoresistance (GMR) effect in 1988

 Ten years later: Beginn of Mass Production (innovative magnetic field sensors, which are used to read data in hard disk drives)

Basic Research

Applied Research

Industry Development

Mass market product

CONCLUSION AND GOALS

- TechTransfer in EU and Germany is on the way, but improvement still necessary
- enormous potential for applied / contract research and strategic collaboration at large scale facilities
- Unique Research Infrastructure is a basis for disruptive Innovation
- Trends of Open Innovation and new possibilities of Big Data
 Management should be used
- Goals in the field of Innovation and large Infrastructure:
 - Enable innovation by better communication of advantages and easier access to beamlines etc. for industry and SMEs
 - Create appropriate incentives for collaboration and transfer
 - But: important to maintain the balance between basic research and commercial use
